

Plumly

Capture intent. Show up.

PRESS ONE-PAGER

The iOS app for everyone whose camera roll is a graveyard of plans they never made.

Plumly takes everything you screenshot, dictate, paste, or share, reads it with AI, and brings it back when it matters: concerts from the artists in your Spotify, saved places that resurface when you are nearby, events that drop into your calendar, and a heads-up before tickets sell out. Snap a flyer and it becomes a plan you can text the group in one tap.
